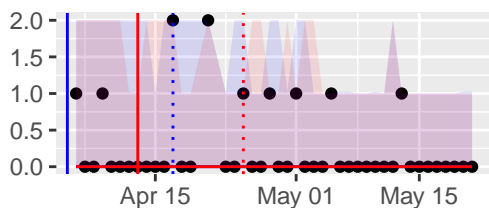

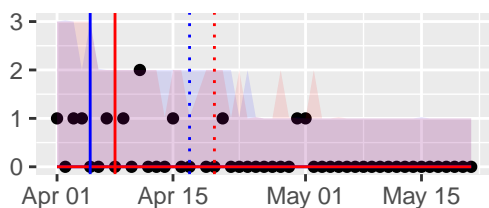

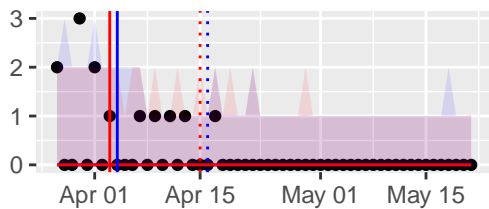

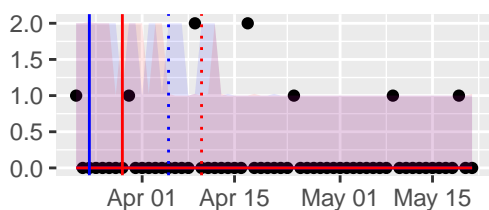

Figure 1 is a line graph showing the daily number of cases in the United States from April 2020 to May 2020. The y-axis represents the number of cases (0 to 5). The x-axis shows dates: Apr 27, May 04, May 11, and May 18. A solid red vertical line is at May 04, and a dashed red vertical line is at May 11. The graph shows a peak in cases around April 27, followed by a decline and then a period of low case counts.
