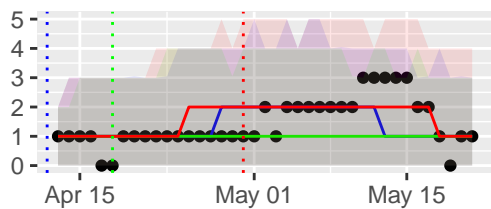

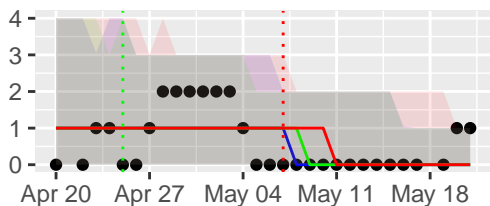

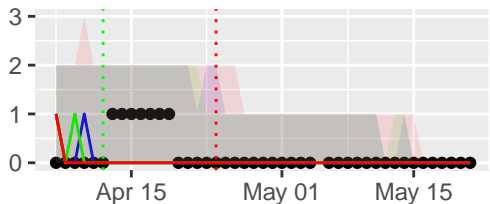

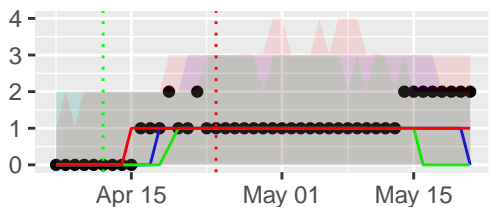

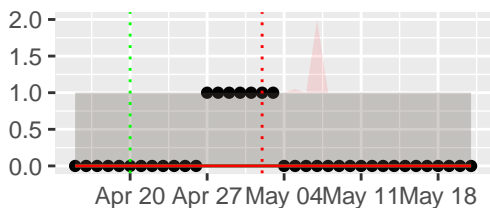

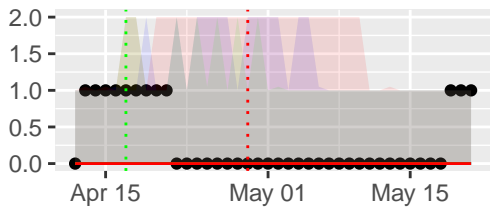

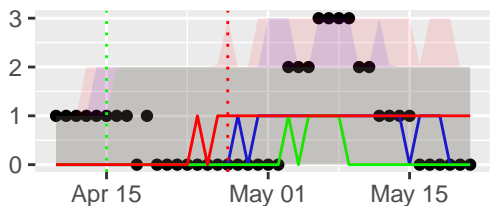

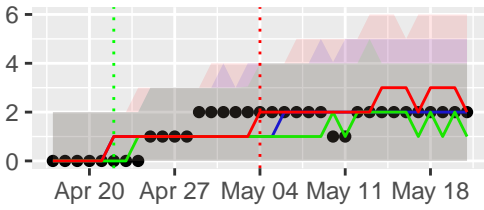

Figure 1 is a plot showing the number of cases (black dots) and deaths (red line) over time from April 15 to May 15. The y-axis ranges from 0 to 4. The plot includes a grey shaded area representing the uncertainty interval and a red line representing the estimated number of cases. Vertical dashed lines indicate the dates of the first and second waves.

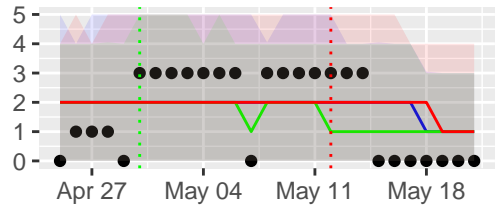

The plot displays the number of cases (black dots) and deaths (green line) over time from April 15 to May 15. The y-axis represents the number of cases and deaths, ranging from 0 to 3. The x-axis shows dates: Apr 15, May 01, and May 15. A grey shaded area represents the uncertainty interval. A red line indicates the expected number of cases, and a green line indicates the expected number of deaths. Vertical dashed lines mark the first and second waves.
